Quality Consulting made in India

In 2022 we started our sister company **Consiness India Private Limited** in the IT hub Pune, a city in the state Maharashtra, India with a Metropolitan population of over 7,5 million.

Our growing Indian team of now four experienced SAP senior consultants, led by Puspendra Chundawat convinces with quality consulting, helping our customers to implement projects efficiently and cost-effectively. A strength of the team, in addition to its technical competence, is its many years of experience in dealing with European customers. There are no frictional losses in English-language communication that could result from cultural differences. Our goal is to also provide target-oriented and sustainable advice with the Indian team in different areas of SAP consulting and development, such as SD & MM, IBP, BW/4HANA, SAC (SAP Analytics Cloud) & BO (Business Objects), and more modules to come.
